National Adaptation Strategies (NAS)

Reviews of European NAS e.g. the PEER Study have found (Biesbroek et al., 2010):

“in most cases approaches for implementing and evaluating the strategies are yet to be defined”

Currently just three countries with some kind of evaluation system:

- **UK**
- **Germany**
- **Finland**

Source of map: Climate-ADAPT

Overview of the presentation

My presentation compared the **national adaptation M&E frameworks** of three countries: UK, Germany and Finland.
